PROFESSIONAL SUMMARY

AI is in everyone's hands. Experience isn't. Senior Product Engineer - Full Stack with 5+ years of shipping production software across utilities, healthcare, and HR technology, specializing in React.js, Node.js, .NET and scalable web application development.

Delivered measurable impact: 20% faster application load time, 30% higher development efficiency through reusable components, 30% fewer testing defects, and 25% fewer system crashes. Strong experience in MERN stack development, API integration, and performance optimization.

Uses AI tools as a multiplier, not a substitute: built and launched Postline, a Claude connector for LinkedIn, end to end on Cloudflare Workers.

PROJECTS

Postline - Claude connector for LinkedIn · Creator 2026

github.com/bhardwajhimanshu2515/postline

- Designed and built Postline, a remote MCP (Model Context Protocol) server that lets Claude publish, schedule, edit, and delete LinkedIn posts and read the user's profile, across 7 tools
- Built on Cloudflare Workers in TypeScript, with OAuth 2.0 sign-in to LinkedIn, a D1 database for the post queue, KV storage, and a cron trigger that publishes scheduled posts on time
- Covered the full flow with end-to-end tests against a mock LinkedIn API
- Submitted to Anthropic's Claude connector directory (in review); shipped the launch solo with an open-source repo, a Medium write-up, and a promo video

PROFESSIONAL EXPERIENCE

Senior Product Engineer - Full Stack · Smart Energy Water Pvt. Ltd. Jan 2025 - Present

Product: Alectra Builder

- Engineered scalable full-stack web applications using React.js, Next.js, Node.js, and .NET, delivering high-performance user experiences
- Developed modular, reusable UI components and optimized rendering, improving frontend performance and maintainability
- Integrated frontend with RESTful APIs built on .NET, ensuring reliable, secure, and scalable data exchange
- Designed and optimized database queries using SQL and MongoDB, reducing response time and improving data efficiency
- Debugged and resolved critical production issues, significantly enhancing application stability and user experience
- Implemented automated testing and code quality practices, reducing defects and improving release reliability
- Collaborated cross-functionally with backend and product teams to define API contracts, system architecture, and performance improvements

Product Engineer - Full Stack · Smart Energy Water Pvt. Ltd. Aug 2023 - Jan 2025

Product: American Water

- Developed scalable, high-performance web applications using React.js, Redux, and REST APIs, integrated with enterprise-grade .NET backend services
- Optimized application performance, achieving a 20% reduction in load time through efficient rendering, code-splitting, and state management improvements
- Built modular, reusable UI components, increasing development efficiency by 30% and ensuring consistency across the application
- Integrated and debugged .NET REST APIs, ensuring reliable data flow, error handling, and seamless frontend-backend communication
- Implemented unit and component testing using Jest and Enzyme, reducing testing defects by 30% and improving code reliability
- Led debugging and resolution of critical frontend and backend integration issues, reducing system crashes by 25% and improving user experience
- Designed and developed scalable architecture with a focus on performance, maintainability, and clean code practices
- Collaborated with cross-functional teams to define API contracts, improve system performance, and deliver production-ready features

React.js Developer · Global Healthcare & Billing Partners Mar 2022 - May 2023

Product: Claimocity

- Designed and developed cross-platform applications (Web, iOS, Android) using Ionic React and TypeScript, delivering consistent and scalable user experiences
- Built and integrated RESTful APIs using Node.js, enabling efficient and secure data communication across platforms
- Optimized MongoDB queries and backend logic, reducing API response time by 20% and improving overall system performance
- Developed reusable, modular components and maintained clean architecture for better scalability and maintainability
- Collaborated within a 10-member agile team to deliver end-to-end healthcare billing solutions, ensuring timely and high-quality releases
- Worked closely with product and backend teams to define requirements, improve workflows, and enhance application performance

React.js Developer · Talentroots Apr 2021 - Mar 2022

Product: Emplify

- Led frontend development for an HRMS platform using React.js and Redux Toolkit, building scalable, maintainable, and high-performance user interfaces
- Developed and integrated GraphQL APIs using AWS AppSync, enabling efficient data fetching and real-time updates
- Integrated third-party services such as Gusto and Slack APIs, enhancing product functionality and user workflow automation
- Designed and developed a Slack app, improving user engagement by 15% through seamless in-app interactions and notifications

Platform Ops - Intern · XenonStack Feb 2021 - Apr 2021

- Developed full-stack features using React.js, Node.js, GraphQL, and MongoDB, contributing to scalable and high-performance applications
- Built and evaluated Proof of Concepts (POCs) to explore new technologies, improving decision-making for architecture and feature implementation
- Implemented and integrated GraphQL APIs, enabling efficient data querying and optimized frontend-backend communication

MERN Stack Developer - Intern · The Youth Project May 2020 - Feb 2021

- Developed scalable full-stack applications using React.js, Node.js, and MongoDB, delivering end-to-end features with high performance
- Designed and implemented RESTful APIs, ensuring efficient, secure, and reliable data communication between services
- Built and optimized CI/CD pipelines, enabling faster and more reliable deployments across environments
- Improved deployment workflows using Heroku and Netlify, reducing manual effort and enhancing release efficiency
- Focused on clean architecture, modular code, and performance optimization to build maintainable and production-ready applications

EDUCATION

B.Tech in Computer Science · Poornima University Aug 2017 - Jun 2021

SKILLS

Frontend: React.js, Next.js, Redux, Redux Toolkit, Zustand, React Query, JavaScript, TypeScript, HTML, CSS, SCSS, Material UI, Ionic React, Vite

Backend and APIs: Node.js, Express.js, NestJS, REST APIs, GraphQL, AWS AppSync, .NET integration, WebSockets

Databases: MongoDB, Mongoose, SQL, DynamoDB, Cloudflare D1

Cloud and AI: Cloudflare Workers, MCP (Model Context Protocol), OAuth 2.0

Testing and delivery: Jest, Enzyme, Git, GitHub, CI/CD, Heroku, Netlify, Jira, Confluence, Scrum
